TECHNO-COMMERCIAL BID relating to the LICENSING of KNOW-HOW on Biodegradable Dispersing Agent for Dry Tanning

CSIR-Central Leather Research Institute has developed a new “Biodegradable Dispersing Agent” for carrying out Tanning without Water or any other medium (Dry tanning).

Salient Features of the Biodegradable Dispersing agent

- Minimum infrastructure required to produce
- Availability of raw materials in India/Abroad is abundant

Potential benefits of using the product for the purpose of tanning

- No water or any other medium is required.
- Saving in water to an extent of 5L/kilo of raw hide/skin during tanning process step (for entire Indian tanning sector, potential saving is around 15 million L of water every day).
Complete elimination of salinity in tanning.
Near Zero Discharge in tanning
Saving in time and energy upto 30%
Significant cost reduction of tanning
Productivity enhancement

The Institute now proposes to license the KNOW-HOW on the Biodegradable Dispersing Agent for commercialization.

Interested Leather Chemical companies having experience in manufacturing and marketing in Indian/global leather sector may submit LETTER OF OFFER along with appropriate credentials, intended jurisdiction of market for operation and Financial offer in sealed cover.

Technical and commercial details, as indicated below, may be submitted in sealed cover.
